

## Monitoring on the Move

The Video Van is a **mobile video village**.

You can ride in it and control the action as it unfolds. You can use it as a stationary monitoring position that is quick to relocate.

The system is equally at home on a static set, or travelling down the road in pursuit of a camera car.

## Features

**Comfortable interior** - air conditioning, reading lights, retractable blinds & adjustable seats.

**Monitor mounting points** available for all seating positions.

**Spacious work area** - suits main monitor up to 24".

**Technician-friendly** - aerial mounts on roof, rigging hardware included, arrives pre-rigged.

### Aerial mounts

Securely add as many receivers and transmitters as required.

### Monitor mounts

Quickly add monitors - all hardware carried on board.

### Operator's station

Add camera controls if required - fully adjustable positioning in a comfortable space.
