Location Nurse

Opening my Melbourne home to many film crews over the years, I have come to understand the teamwork required by a crew of freelancers to ensure a safe, efficient and productive shooting session.

With my flexible roster at St Vincent's Hospital Emergency Department, I am available for long and short-term location nursing contracts and can take on work at very short notice.

I accept local and interstate assignments.

My Nursing career spans a wide range of specialties including Emergency Department, Remote Area Nursing, Community Outreach and teaching First Aid. My experience in acute, chronic, acute and mental health has prepared me well to provide nursing care on a film set.

Eben Olson, Locations Scout/Manager at Reel Locations, is happy to be contacted to discuss my suitability as a team member for your next production.
