Rep'd By [Worldwide Production Agency](#)

A career of images is hard to express in words... I am a lover of light, colour and movement, partial to darkness too. After studying experimental film, I honed my technical skills by working my way up in camera departments on feature films and commercials with 35mm film. Originally from Australia, my career has been as versatile in style as it has been in genre. Driven by my passion for narrative- driven composition and lighting extends through my drama, documentary and commercial work. Nominated for a BAFTA Cymru for Cinematography in Feature Documentary and with the BFI feature SWEETHEART doing well in film festivals internationally, I am creative and passionate about the work I deliver, believing in the true collaboration of film. All credits below are as Director of Photography unless stated otherwise.
