resume

Summary

With 20+ years Melbourne sound recordist Martin Keir found his way into the film and television industry through being closely involved in the theatre. He has recorded sound across the corners of the globe from the nuclear reactors of Chernobyl to ice dark winters in Sweden; from the Bhutan Palace for afternoon tea with Queen Jetsun Pema to Margie Robbie's first episode on Neighbours.

As well as working on scripted content for feature films, comedy and drama; Martin has also worked on documentaries, commercials, sport and reality TV.

Some of his favourite projects have been capturing moments with strong stories and complex characters. Working with the late and generous John Clarke on *Ex PM* was a highlight as was sharing Eric Banner's story in *Love the Beast*. Travelling internationally with Emmy award winning filmmaker Sonya Pemberton, with the opportunity to work alongside Nobel laureates and with such presenters as Dr Derek Muller have also been highlights.

Features

- Operation and ownership of the new, ground breaking, digital A20-Nexus wireless radio mic system. (<https://www.sounddevices.com/product/a20-nexus/>)
- Cloud Based Frame IO integration with both 32 and 18 Channel Audio recorders for data upload
- Portable production sound cart specifically set up for drama shoots with 32 channel Sound Devices audio recorder; 12 channels of Lectrosonics radio mics plus the new innovative A20-Nexus wireless radio mic system.
- Special interest in recording choirs and acoustic performances with various stereo

- microphones including MS Schoeps and U69 large diaphragm Neumann mics.
- Experienced at recording sound in extreme weather with the appropriate equipment to do so.
- Streaming set up and operation with Black Magic ATEM mini for live streaming into studio shows and international interviews.
- Data management, lighting, camera operation, and production skills and equipment due to crewing small team both internationally and locally.
