BIO

I've worked in the film industry as a freelancer since 2019 starting with a small kit and working on dozens on independent films. I graduated from a Bachelor of Audio from SAE with a major in Post Production, which has helped dramatically as these skills translate to sound recording and boom operating. Over the last 3 years I've focused my career more as a boom operator, having the pleasure to work on Neighbours in it's final years, which taught me great fundamentals.

Previous to studying audio I worked in Hospitality for 8 years roasting coffee and studying viticulture. During this time I played in bands and mixed live bands on weekends.
